PROFILE

Dynamic Software Developer with a strong track record in delivering high-quality projects for the betterment of the healthcare field. Proficient in TypeScript, and with expertise in React.js, GraphQL, and Git in an Agile development environment. Eager to bring my expertise to a team that tackles challenging projects and fosters continual growth. Able to effectively self-manage during independent projects, as well as collaborate as part of a productive team.

EMPLOYMENT HISTORY

Aug 2023

Software Engineer, Alpha Nodus

Sunrise, FL

Currently working as a Software Engineer at Alpha Nodus, being involved in developing and maintaining software solutions using technologies such as React, Typescript, and GraphQL. Taken leadership over the Chrome Extension feature of the product, ensuring user-centered design and achieving better maintainability and user satisfaction.

- Led a team of developers to successfully complete a major software project on time and within the customer's specifications.
- Collaborated with cross-functional teams to gather requirements and implement solutions that meet business needs.
- Contributed to the overall success of the company's mission to deliver high-quality software solutions while using the most modern development methodologies.

May 2022 — Apr 2023

Operations Coordinator, Kobax

Miami, FL

As an Operations Coordinator at Kobax, I was responsible for coordinating and overseeing daily operations to ensure smooth and efficient processes.

- Achieved seamless management of end-to-end importing operations for 30+ full container loads per month into the United States, resulting in reliable and timely deliveries to clients across multiple locations.
- Successfully implemented a pricing analysis system, leading to optimized and actionable cost structures, increasing 5% average profitability for orders.
- Conducted thorough analysis and optimization of the logistics process, leading to substantial 20% cost savings and improved financial performance on every shipment.

EDUCATION

Jan 2016 — Jan 2021

BSc Industrial Engineering, Andres Bello Catholic University

React	Agile development
Typescript	Leadership
GraphQL	Collaboration
Github	User-Centered Design
AWS	Innovation
JavaScript	Health Systems

PROJECTS

TCGDealy

Chrome Web Store

Chrome extension that automates TCG items sourcing on the popular website tcgplayer.com. It runs client-side and helps users save their favorite items and set different thresholds so the workflow can find the best deal. [Link](#)
